Four easy steps to successful Mycotaxon publication in 2010

Mycotaxon's complete instructions, which were last updated in June, 2010, are posted on the Instructions to Authors page on the Mycotaxon website listed below. Prospective authors should download instructions PDF, expert reviewer comment and submission forms, and helpful templates by clicking the 'file download page' link on the instructions page before preparing a paper intending for the journal. NEW: doi reference numbers must be added to cited references prior to sending a manuscript out for review. (See Mycotaxon 112: 514–515.) Below is a summary of our simple '4-step' publication process.

Step 1—Peer review: Authors send a formatted text document with illustration files and Mycotaxon Reviewer Comments Form to two experts for peer review. Authors should (i) ask the two peer reviewers to return final reviews and comment forms to both *Editor-in-Chief* <editor@mycotaxon.com> and authors in the same Email and (ii) revise their manuscript according to reviewer suggestions **before** submitting all text files to the *Nomenclature Editor* for nomenclatural review.

Step 2—Nomenclatural review: Authors next Email their revised master text file (containing footnotes, tables and captions but ***NO*** illustrations) to the *Nomenclature Editor* <PennycookS@LandcareResearch.co.nz> for accession and pre-submission review. The Email message *MUST* include the word 'Mycotaxon' on the subject line and *MUST* include names **and** Email addresses of all peer reviewers. The Nomenclature Editor will return annotated files with a list of needed corrections to the authors and *Editor-in-Chief*.

Step 3—Final submission: After authors receive their manuscript accession number and make revisions requested during nomenclatural review, they should send (i) a completed Mycotaxon submission form; (ii) separate text files for main text, tables, and legends; and (iii) art files to the *Editor-in-Chief* <editor@mycotaxon.com>. Only text and image files considered ready for immediate publication should be sent at this time. The *Editor-in-Chief* will try to acknowledge receipt of expert reviews and submissions within two weeks of final submission. Authors should wait at least 14 days before sending a follow-up query (without attachments) to avoid unnecessary Email traffic near publication deadlines or during temporary closures of the editorial office.

Step 4—Press preparation: After preparing a publication-quality PDF from the author's text and art files, the *Editor-in-Chief* sends journal entries for the nomenclatural novelties and author index pages with the PDF proof to all coauthors for approval. Editorial errors are always corrected free of charge, but authors who ask the *Editor-in-Chief* to correct errors present in their original files will be charged $10 per correction (minimum charge of $40). Payment arrangements of all fees should be made by writing the *Business Manager* <subscriptions@mycotaxon.com>.

Mycotaxon frequently updates its webpages and regularly posts abstracts, table of contents, book reviews, indices, distributional checklists, and revised instructions and forms on its website. We invite all of you to browse our website frequently for updated journal and other interesting mycological news.

www.mycotaxon.com

Mycotaxon is published quarterly during the periods of January–March, April–June, July–September, and October-December by **Mycotaxon, Ltd.**, 316 Richard Pl., Ithaca, NY 14850. USPS Publication # 16-121, ISSN # 0093-4666. Periodical postage paid at Ithaca, NY, and at additional mailing offices. Subscription rates for 2010: In U.S. and possessions, one year, $330.00; reduced rate for personal subscribers, one year, $150.00. All foreign subscriptions: Canada/Mexico add $15, all other countries add $40 for IMS air mail.
